PROFESSIONAL EXPERIENCE

HDFC Life – Sr. *Software Engineer*

 December 2020 – Present | Mumbai, India

Leading backend development using Node.js and AWS for various digital insurance products and services.

Key Projects:

- **EzFi (Low-Code Insurance Platform):**
 - Developed backend with Neutrinos low-code for partner-led insurance journeys.
 - Tech Stack: Node.js, PostgreSQL, Redis
 - **Life99 (NPS Buying Journey):**
 - Full-stack development (React + Node.js) for retirement planning.
 - Used Redis for caching and MongoDB/PostgreSQL for storage.
 - **Account Aggregator Platform:**
 - Designed microservices to fetch users' financial data securely.
 - Integrated bank, mutual fund, and insurance data fetch modules.
 - **AD-AUTH (Internal OAuth2 Auth Service):**
 - Built custom JWT-based OAuth2 auth microservice for internal users/agents.
 - Integrated Jest for TDD and MongoDB as the database.
 - **Credit Bureaus Microservice:**
 - Integrated 3rd-party APIs (CIBIL, CRIF, Experian, Equifax).
 - Enabled secure credit score retrieval and payment gateway integration.
 - **Partner Integration (SOAP to REST Conversion):**
 - Converted SOAP-based APIs to modern REST APIs for third-party partners.
 - **Notifier Service:**
 - Built centralized notification system using Slack, WhatsApp, AWS SNS.
 - **Locality Engine:**
 - Microservice to fetch location data using official PinCode dataset.
